CHAUTAUQUA DAIRY CO.,
Syracuse, N. Y.

Cake Filling Made From Water-melon Preserves.

Drain the sirup from a pint of the watermelon preserves, add one cupful of sugar and boil until it threads. Chop the preserves fine, add to the sirup, take from the fire, beat until partially cooled and spread between layers of any kind of cake.

TIMELY HINTS FOR WOMEN READERS

Oil for Sunburn.

The veriest tyro knows, or should, that to put water on sunburned skin is to make the pain infinitely worse. No matter if the burned skin can be under water for ten minutes or more, it will still pain more later for immersion. When one has been so unfortunate as to have the face scorched to the point of blistering there is nothing for it but to resort to oil, and when possible, the victim should go to bed that the application may be used unobtrusively. It is by no means uncommon for a man, sailing or swimming, to burn his shoulders to blisters, and when that happens, relief comes quickest by wetting pieces of absorbent cotton with olive oil and keeping them over the tender places. When he cannot do this, a healing application is made from two drams of strong spirits of camphor mixed with an ounce of benzoated oil of zinc ointment. This may be used freely. Always the greatest care must be taken not to break any blisters which may have formed.

When the burn is slight, such as affects a face that may have received slight protection, a simple remedy that may be carried about is a paste made from magnesia and water. It is mixed to the consistency which will spread easily, and stays on for not more than three minutes. It should be removed with warm water, in which is a little soap. No remedy acts quick when pain is severe. It is just as much a burn as though done with fire, and can be drawn out only by degrees. The after redness may be bleached out with buttermilk, using it frequently as a wash, letting it dry in. The odor is not pleasant, and it is a good plan to follow with a wiping of rose water. Daily use of lemon juice is very effective for preventing slight redness, when the skin has not been burned. That is, the fruit is a preventive rather than a cure. I think, for it is both bleach and astringent, and if it is not expected to convert a muddy skin into one of creamy texture, will be regarded decidedly as a beneficial agent. The simplest way of applying is to have a thin fresh slice each time, rubbing over the skin and letting the moisture dry in.

Fads for Women.

A leghorn hat that has become soiled and somewhat grimy from street and perhaps a shower can be changed into the deep golden shade so fashionable just now. The trimming should be removed and the hat subjected to a thorough washing of soap and water, adding a little ammonia. After thoroughly rinsing the hat should be smoothed into shape for drying.

THE BRITISH CRISIS

XVI The Liberal Party.

By FREDERIC J. HASKIN

LONDON, July 10, 1910.

The liberal party in Great Britain is an even less compact political organization than its great rival, the conservative party. When in power, as it has been since 1905, the liberal party has the support in parliament of the liberal party and the liberal party. Yet these two groups are most insistent upon their independence, and each of them has its own leaders who are the equals in party position of the cabinet ministers, who are the accredited and responsible leaders of the liberal party. The position of the liberal party has proved to be successful and effective, however, and there is an increasing disposition to regard the liberal party as a member of parliament, unless he is supported by outside contributions.

In Great Britain the trades unions operate under a charter from parliament, by which their powers and privileges are defined and limited. The unions levy a regular assessment upon their members to defray expenses of labor candidates for parliament, and to give each member elected an annual salary of \$1,000. A member of the Amalgamated Society of Railway Servants used the union on the ground that it had no right to levy an assessment for the purpose of paying salaries to members of parliament, because of the condition that all candidates should sign and accept the conditions of the labor party, and be subject to the labor whip.

The case came, in the course of events, to the house of lords, which is not only the upper chamber of the British legislature, but also the supreme court of the British empire. The lords decided that the union had no right to assess their members for the support of labor members of parliament. In the event that the present constitutional crisis should result in a victory for the commons, and the veto of the lords should be abolished, it is certain that parliament will provide for salaries for its members. When that is done, the socialists and the labor party will have lost another of its advantages in controlling the government. Under the practice that each member of parliament could afford to take seats in parliament, both parties returned a great majority of landed gentry, and the hope of the labor party, tending to curb the exorbitant of the land trust.

The commons in May, 1909, adopted a resolution declaring that the non-payment of members of parliament was a violation of the constitution, and that the commons should exercise a free choice in the selection of candidates and election of members of parliament, and expressing the sense of the commons that members should be paid a regular salary and that the commons should pay the cost of conducting the elections. This resolution was adopted by a vote of 242 to 92, but legislation to make such a scheme effective is utterly impossible as long as the house of lords exercises its present power.

It is interesting to note that the commons have decided to pay the commons and the commons have decided to pay the commons. The commons have decided to pay the commons and the commons have decided to pay the commons.

The commons in May, 1909, adopted a resolution declaring that the non-payment of members of parliament was a violation of the constitution, and that the commons should exercise a free choice in the selection of candidates and election of members of parliament, and expressing the sense of the commons that members should be paid a regular salary and that the commons should pay the cost of conducting the elections.

Medicine Chest For Vacation

Going on your vacation? Away from the haunts of men? What are you going to do in case you fall sick? Lack of space necessitates your taking one remedy for many ills. Take Duffy's Pure Malt Whiskey with you. It is a whole medicine chest in itself.

Most efficacious remedy known for chills, fever, colds, dysentery, diarrhoea, nausea, sunstroke and all summer ills. It is a wonderful remedy in the prevention and cure of typhoid and all other intestinal diseases. Used in your drinking water, it assists in killing disease germs and purifying the water.

Health and Beauty Notes

Country Girl: Isn't it your own fault that your sweetheart appears to be losing interest in you? If other girls take pains to make themselves attractive to him, instead of putting or repining you should immediately take steps to put yourself on an equal footing with them. To clear your complexion and keep it rosy and fresh follow the advice given above to G. O. I. and apply to your face, neck and arms daily a lotion made by dissolving four ounces of alumina in a half pint of hot water and adding two teaspoonsful of lemon juice. This will help your dark face and neck will give you a beautiful complexion and is much better than powder, because it will not rub off or show. Spurns will follow the advice given above to G. O. I. and apply to your face, neck and arms daily a lotion made by dissolving four ounces of alumina in a half pint of hot water and adding two teaspoonsful of lemon juice. This will help your dark face and neck will give you a beautiful complexion and is much better than powder, because it will not rub off or show. Spurns will follow the advice given above to G. O.
